

Dear Sirs:Satellite radio benefits me in many ways, but mostly because I live in an area of the country where remote, rural driving is the "norm" for me. Using satellite radio, I am assured of continuous signal regardless of the distance from me to the nearest normal (non-satellite) broadcasting site.

I pay for the services from satellite radio, and the National Association of Broadcaster's (NAB) should not be allowed to dictate what I hear, and what I don't hear. Please leave satellite radio "as is" by rejecting the NAB petition # 04-160.

Thank you,
Kevin McMahon
